

Oviva Moves to T-Systems Sovereign Cloud Powered by Google Cloud to Accelerate Growth And Provide Patients Easier Access to Care

Zurich, Switzerland - July 25, 2023 – Oviva, a digital health company that provides app-guided therapy to improve the eating and lifestyle habits of people with obesity, today announced that it has moved its German infrastructure to the [T-Systems Sovereign Cloud powered by Google Cloud](#). The move will enable Oviva to accelerate its growth by providing a more stable, scalable, and secure platform for its services.

“We are excited to partner with T-Systems and Google Cloud to bring our innovative digital health solutions to more people,” says Demian Jäger, Director Engineering - DevOps at Oviva. “The T-Systems Sovereign Cloud powered by Google Cloud provides us with the stability, scalability and security that our services require to deliver high-quality care to our patients.”

The T-Systems Sovereign Cloud powered by Google Cloud is a cloud platform that has been designed to meet the specific needs of healthcare organizations and other highly regulated industries. The platform offers a high level of data sovereignty and security, as well as the scalability and flexibility required to support the growth of digital health services. With its strong emphasis on data protection in accordance with the EU-GDPR, the Sovereign Cloud allows Oviva to expand their services in the German market while meeting the strict local regulatory requirements. Oviva had previously migrated its French operations to Google Cloud and now runs operations in Switzerland, UK, France and Germany in the same setup.

“We are proud to partner with Oviva to help them deliver their innovative digital health solutions to more people,” said Andreas Greis, Senior Vice President Google Powerhouse, T-Systems. “The T-Systems Sovereign Cloud powered by Google Cloud is the perfect platform for organizations that need a secure, scalable, and reliable cloud environment.”

With the move to the T-Systems Sovereign Cloud powered by Google Cloud, Oviva is well-positioned to accelerate its growth and improve accessibility to its services. Eventually, the company will reach more people who need help managing their weight for a healthier future. For further information, read the recently published [case study](#).

About Oviva

Oviva’s mission is to provide the most accessible and effective care to people living with weight-related conditions. Founded in Switzerland in 2014, Oviva combines individual coaching with an intuitive app and has already treated over 300,000 patients in Switzerland, Germany, the UK and France.
