About Oviva

We believe good health starts with nutrition and lifestyle, not medication. Our mission is to help 50 million people lead healthier and happier lives by 2025 by providing the best diet and lifestyle therapy through technology.

Oviva is a technology-enabled healthcare provider founded in 2014 seeking to offer the most accessible, personalised, high-quality care possible to people with health conditions related to diet. Crucially, we embrace technology to overcome the efficiency challenges facing the NHS.

We do this by:

- Creating unique, digitally-enabled treatment programmes for patients, delivered by dietitians supported by a multi-disciplinary team of psychologists, psychological wellbeing practitioners, specialist nurses, activity experts and health coaches.
- Offering patients access to expert advice in a time and place of their choosing, via phone, our smartphone app and online learning portal (with tailored video, audio and written learning content).

Our services are delivered in partnership with the NHS, supporting quality and efficiency improvements. Today we provide NHS services in 57 Clinical Commissioning Groups and were recently selected for the NHS England Digital Diabetes Prevention Programme and the NHS England Innovation Accelerator. Beyond the UK we also operate in Switzerland, Germany, and France, and are backed by Europe's leading venture funds.

We can only deliver all of this with the help of our incredible team. Having a culture that people want to work in is very important to us and we're proud to say 96% of our team would recommend working for Oviva. We do this by keeping our values at the forefront of everything we do, from patient care to internal culture:

- We put the patient first
- We measure & improve
- We tackle it together

The Role

Diabetes Support Education

We are looking for bank diabetes specialist dietitians to deliver a new, evidence-based type 2 diabetes structured education programme called Oviva Diabetes Support (ODS) for people living in various locations across the UK such as in NWL, Wolverhampton, Buckinghamshire etc. The programme combines a core curriculum and an intensive behavioural change intervention and aligns with the NICE guidelines. ODS is a fully digital and remote, QISMET approved, diabetes education programme.

You will be providing one to one initial consultations as phone or video calls, and all patients will then be offered remote follow-up treatment using the Oviva smartphone app where they can track food / activity, ask questions, and receive text-based feedback from the dietitian on a weekly basis. Participants are led through the programme via an online portal with engaging video resources to support information delivery and behavior change coaching delivered by the HCP.

Successful candidates will have strong clinical experience including prior experience in supporting patients with diabetes and weight management, and be familiar with or show a willingness to embrace remote treatment and support. They will benefit from joining an innovative and supportive team, committed to enhancing the overall patient experience and delivering better outcomes – whilst enjoying a more flexible working model. There is an opportunity to deliver care on other programmes also including Diabetes Prevention programme.

Due to our patient demographics in the areas we provide support we are very interested in hearing from candidates who are fluent in the following languages along with English:

Punjabi, Urdu, Hindi, Arabic, Gujarati, Somali, Tamil, Polish, Nepalese, Konkani, Portuguese, Slovakian, Czech, Farsi, Romanian, Pashto, Bengali, Chatgaya, Sylheti, Turkish

However if you are unable to speak another language this will not go against your application.

Key Responsibilities

- Delivering one to one patient consultations remotely via phone or video calls.
- (Desirable) Delivering one to one patient consultations remotely via phone or video calls in the patient's main language.
- Using Oviva technology to provide some remote follow-up support and coaching e.g. using the Oviva smartphone app.
- Maintaining accurate and up-to-date clinical records using Oviva's secure electronic medical record system
- Work as part of a remote team of dietitians to deliver gold-standard care to patients with type 2 diabetes.
- Maintaining adequate CPD and continue to meet HCPC registration requirements
- Working in a highly autonomous manner and being responsible for appropriately managing clinical caseload.
- Maintaining confidentiality of information at all times in line with the requirements of the Data Protection Act and ensure that client confidentiality is protected at all times.

The Ideal Candidate

- A healthcare professional that is dedicated to providing the best care for patients, putting their needs first.
- Confident in using technology to record and review patient notes and quick-to-learn in operating Oviva's technology to support patients.
- Understanding the importance of gathering evidence and improving our processes constantly.
- Working well as a member of a team and communicating in an effective, timely and polite manner.

Our Offer

- Competitive hourly rates (Band 6 development role).
- Flexible working hours during the day including evenings and weekends.
- Opportunity to support content creation and programme development as well as delivering our other specialist programmes.

Target start date: Immediate

To apply, please send your CV and cover letter to Anastasia Baliakou, Clinical Team Manager at anastasia.baliakou@oviva.com or call 0207 622 4777 telling us why you'd love to join us at Oviva.
